Water  
Purification  
System**

*Exclusively  
designed for*

**Hotels  
& Resorts**

*Water that you and  
your guests will  
truly savor.*

# “On average, a hotel consumes nearly 30,000 gallons of water every day”.

In today's growing tourism and hospitality industry, hotels strive to offer luxurious and personalized services in order to offer an ultimate and unforgettable sojourn experience for their guests.

Whether it is a crystal clear Swimming pool or Jacuzzi or even a soft and refreshing shower experience in the comfort of each room, purified and conditioned water will surely add value to that unforgettable experience for your guests.

At So~Safe, we recognize your abundant and specialized need for water purification, which is why we offer a complete array of solutions to meet all your water related requirements. Furthermore, we also guarantee that we will design the optimum solution that leads to significant savings in your daily water consumption, thereby offering unmatched return on your investment.

## Benefits:

- Great Tasting Drinking and Cooking Water
- No Clogging or Scaling of Pipes and fixtures
- Less detergent for laundry
- Conditioned and Soft Water for Bathing
- Greater Customer Satisfaction
- Fully Automated & Easy to operate & maintain
- Additional Cost Saving
- Superior Quality Guaranteed

## So~Safe Central Purification System

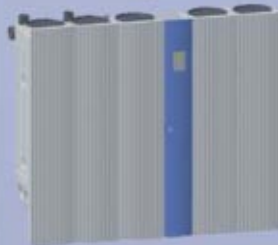

This fully-automated system purifies water in 5 different stages.

- Filtration of sediments and dirt particles up to 1 micron.
- Removal of offensive taste, odor, color, chlorine, and organic chemicals.
- Removal of hard and scale-causing compounds.

The product water is ideal for bathing, washing clothes, and free from scaling in pipes and other fixtures.

## Safe Recycle System with UV Sterilization

This environmentally friendly 4-Stage water treatment system allows for substantial cost savings by reusing water from shower and bath.

Purification is done without the use of any chemicals through a bio-mechanical treatment process.

Once recycled, the germ-free water can be used for toilet flushing, washing, cleaning, and landscaping.

This can reduce your daily consumption up to 50%.

## Advanced So~Safe Reverse Osmosis System

This system is designed to desalinate water by removing salts, thus making it lighter in taste and ideal for drinking.

The capacity of this unit can range from 450 to 1,500 US Gallons per Day depending on your daily drinking and cooking water consumption.

The product water is not only more convenient and cost effective for daily use, is also better in taste than bottled water.
